About Nuneaton Signs

Nuneaton Signs are a Social Enterprise, our main purpose “to provide meaningful employment and training for people with disabilities through the manufacture and sales of signs”.

To put it simply, the more signs that you buy from us, the more people we can get back into the workplace, from long term disability and unemployment benefits.

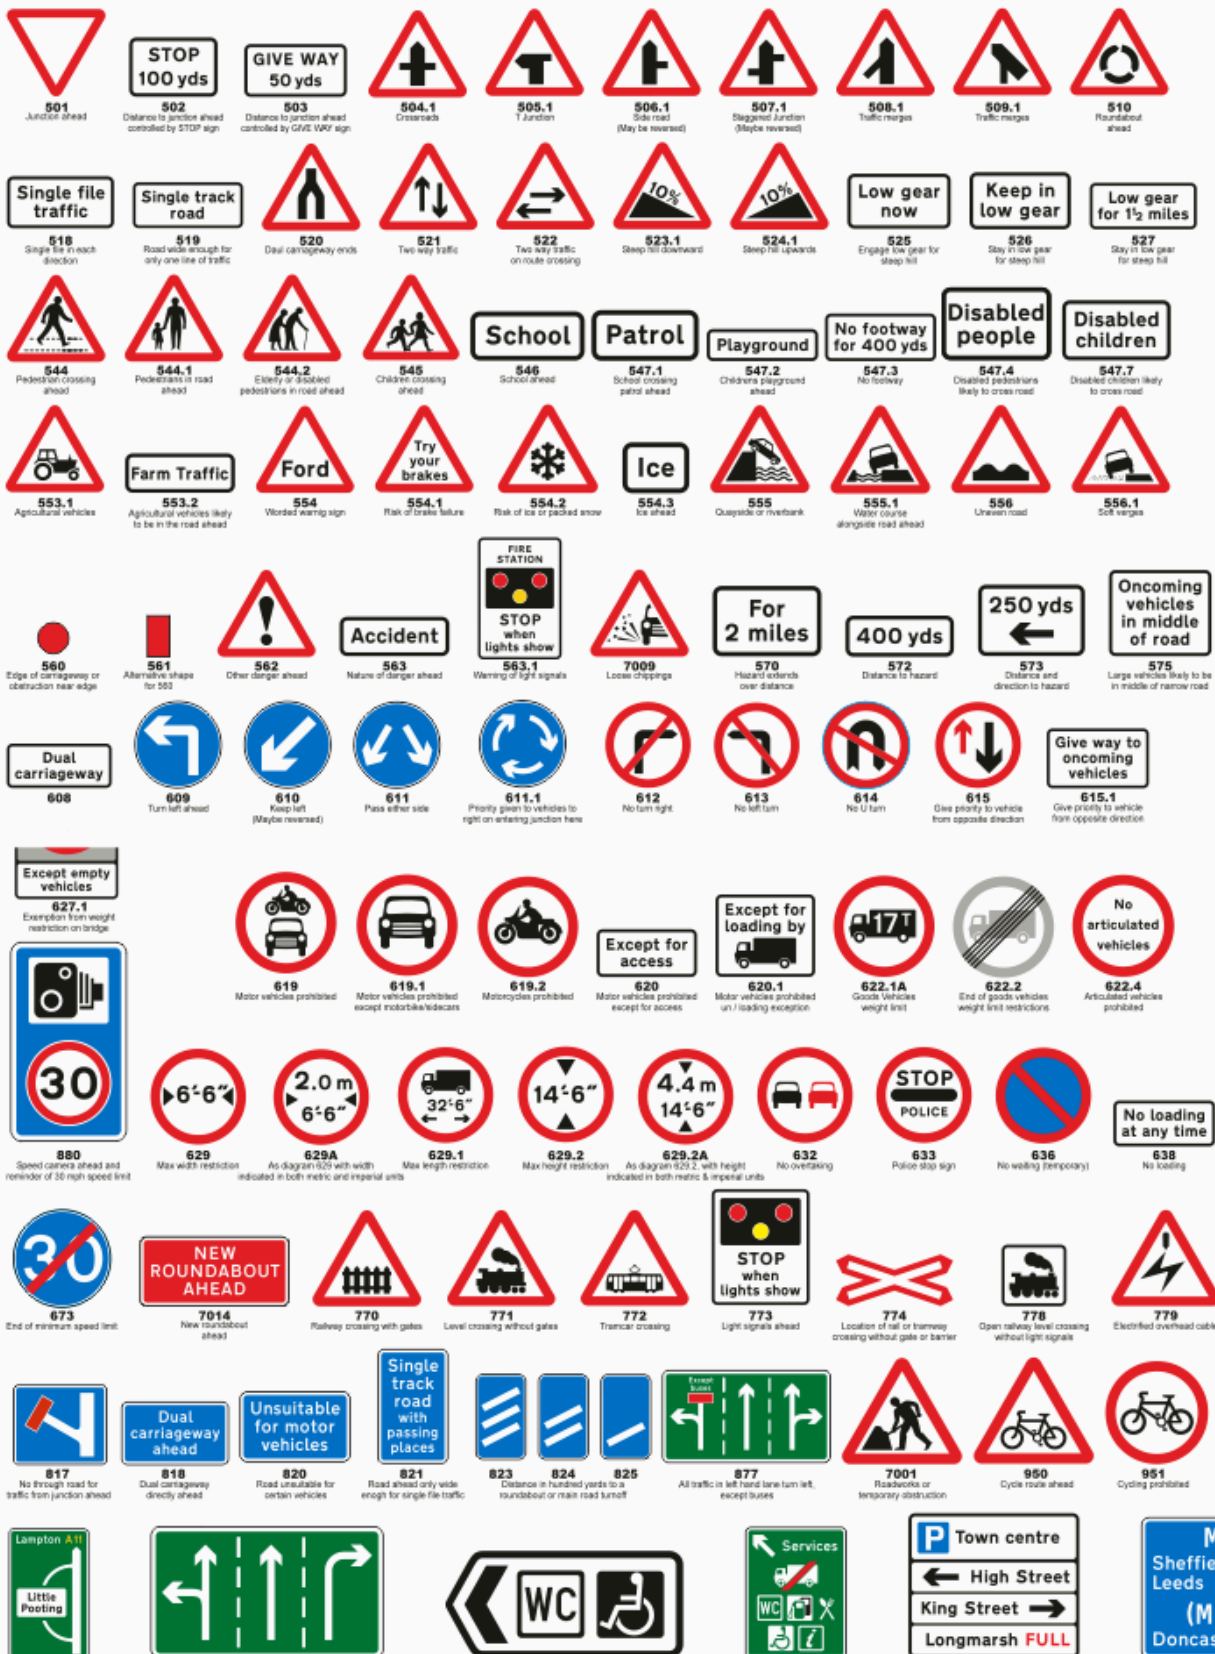

Of our 80 strong staff, 70% have at least one disability. We concentrate on what someone can do, we do not want anyone to be defined by their disability.

Because of the support of companies like you, we have been able to continue working to help people in our local area back into work since 1982. Some staff have been here for 40 years, and others come and go once they have regained their confidence and self-belief.

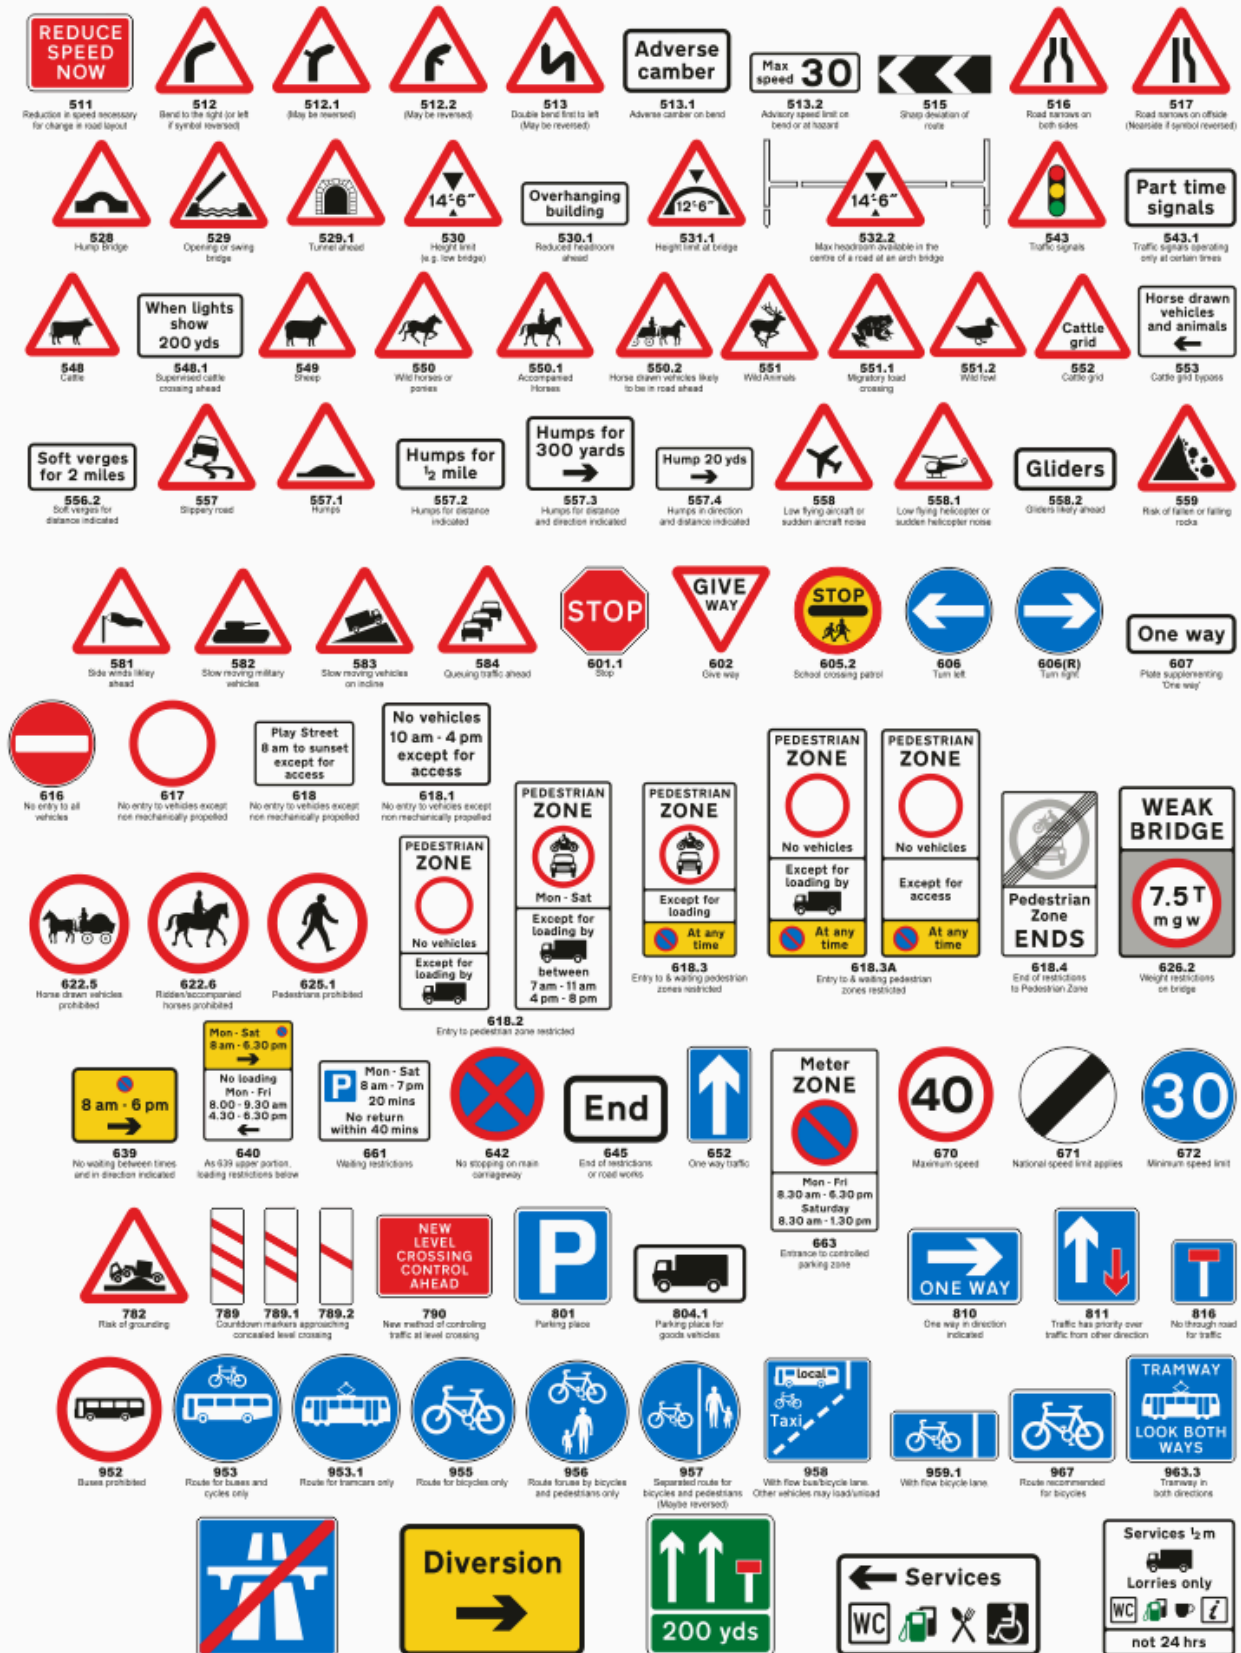

Thanks to your support, any your choice to #BuySocial we can be here for those people who need us, no matter how long they need us for.

If you have to buy something anyway, why not #BuySocial and be the change you want to see in the world.

Permanent Signs

Our ISO 9001:2015 accreditation ensures that all our permanent traffic signs are manufactured and UKCA marked in accordance with BS EN 12899-1:2007

From Non reflective to R3C we can make the lot. We provide a full range of protective overlays from Anti-graffiti to dew resistant.

Our sales & design team can advise you on all aspects of design and manufacture to ensure your signs are effective and fully compliant with full traceability.

Posts and Fixings

When it comes to fixing road signs, we stock a comprehensive range of the fixings you will need to safely fit to existing or new posts.

We have clips for all post sizes whether they be round, square. We even stock clips with rubber inserts for passively safe posts, as well as uniclips for T channelled signs and a range of standard banding and universal bucklestraps.

Post Options:

- Galvanised, painted, plastic coated, steel, aluminium
- Painted finishes available to BS & RAL colours
- Passive safety posts
- Competitive prices

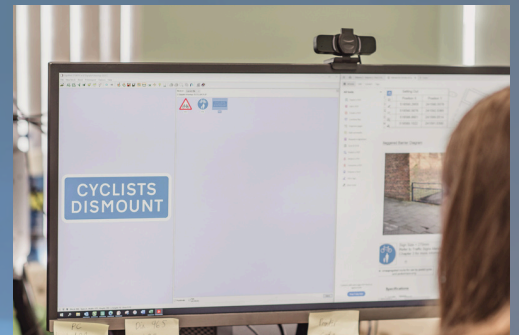

Road Sign Designs

Our dedicated team have substantial knowledge and experience in the sign industry, and are fully aware of the standards and regulations needed to be followed in the design and manufacture of road signs. Our team offer a design service to customise standard signs and create bespoke signs to customer specifications, all conforming to EN12899.1:2007.

Our drawings can be variations of standard signs, or something entirely original. All designs can incorporate images, logos and crests.

Our permanent traffic signs are made from Aluminium, Aluminium Composite Material (Traffic ACM), Steel (HP200).

There are many factors to be considered when deciding upon the most suitable signage substrate. Cost effectiveness, life expectancy, strength, weight and environmental impact to name a few.

Environmental considerations are as important as cost and life expectancy. We're pleased to say that all of our aluminium, steel and ACM signage can be recycled, as are off cuts from manufacture.

Temporary Traffic signs can be manufactured from Aluminium, HP200 Steel, Correx, 100% Recyclable FluteBoard, Zintec, TACM or even Heavy Duty Banner.

Sign Face Materials

The face of your signage can be covered in many different materials. We will help to guide your decision in making sure the material you choose is the right one for your scheme.

R3 A/B/C

High Visibility, perfect for use on motorways and busy roads

RA2 & R2

Engineering grade RA1

Non Reflective

Dew Resistant Sheeting

Gathers water droplets on the membrane surface to allow normal reflectivity.

Anti Graffiti Protective Overlay Film

This film allows graffiti to be easily wiped off signage, when it would otherwise be permanently ruined

760 hours of
supported internship
training and mentoring

£11.8k spent on
specialist equipment
and care to support staff

5 community emergencies
supported with our public
access defibrillator
